

OFFICIAL TOURNAMENT & AUCTION GUIDE

GBL BADMINTON PREMIER LEAGUE

Comprehensive Master Operational Manual for Auctioneers, Officials & Teams
Gulf Oil Lubricants India Ltd. • Kovilpatti Season 2026

WHO IS THIS MANUAL FOR?

This handbook is engineered specifically for auction conductors, organizers, and team owners—including those with ZERO prior knowledge of badminton rules or auction software. Follow this step-by-step to conduct a 100% professional live auction and tournament.

MANUAL MODULES SITEMAP

- CHAPTER 1** Badminton & League 101 (Basics for Non-Sports Officials)
- CHAPTER 2** The Golden Financial Rules (5 Lakh Budget & Reserve Formula)
- CHAPTER 3** Admin Logins & Security Access (Confidential Credentials)
- CHAPTER 4** Step-by-Step Live Auction Guide (The Conductor Script)
- CHAPTER 5** Where & How Teams Place Bids (Mobile Portals & Paddles)
- CHAPTER 6** Tournament Match Results & Live Standings Table
- CHAPTER 7** Troubleshooting, Reset Controls & Emergency Safety Net

Chapter 1: Badminton & Tournament 101

Core Concepts Explained in Plain Terms for Non-Badminton Organizers

1.1 What is Badminton & What is a League?

Badminton is a racket sport played by two opposing players (singles) or two pairs of players (doubles) across a netted court. In the GBL Premier League, games are exclusively DOUBLES (2 players per team on court). 10 corporate teams compete against each other in league fixtures to earn standings points and advance to the Finals.

1.2 Why Do We Have a "Player Auction"?

Rather than arbitrarily assigning players to teams, GBL uses a competitive auction where all 10 teams bid "Points" from their allocated purse. The team with the highest bid when time expires wins that player. This ensures a balanced, dramatic, and completely fair distribution of talent across all squads.

1.3 The 10 Official Teams in GBL 2026

1. Gulf Smashers (GS) Owner: Rajesh K. Varma	6. Gulf Warriors (GW) Owner: Murali Vijay
2. Gulf Thunderbolts (GT) Owner: Anand Mahindra	7. Gulf Blasters (GB) Owner: Saravanan S.
3. Gulf Kings XI (GK) Owner: Sanjay Dutt	8. Gulf Falcons (GF) Owner: Bala Murugan
4. Gulf Strikers (GST) Owner: Dr. Radhakrishnan	9. Gulf Gladiators (GG) Owner: Venkatesh Prasad
5. Gulf Shuttlers (GSH) Owner: Praveen Chander	10. Gulf Titans (GTI) Owner: Ramesh Aravind

1.4 The Player Categories Explained Simply

- Open Category:** Top tier open players of any age with high competitive tournament ranking.
- 35+ Jumbled:** Experienced senior shuttlers aged 35 and above, paired dynamically.
- Veterans Doubles:** Master shuttlers aged 45+ competing in dedicated veteran doubles brackets.
- 80+ Combined:** Doubles pair whose combined ages sum up to 80 years or greater (e.g. 42 + 38).
- Super Doubles:** Fast-paced elite doubles pairings competing at highest tempo.
- Non-Medallist:** Grassroots players who have not won a district/state medal—great for balance.

Chapter 2: The Golden Financial & Budget Rules

How Points, Owner Reserves & Maximum Legal Bids Protect Every Squad

2.1 The 5,00,000 Points Purse Allocation

Every team in GBL starts with a virtual wallet of 5,00,000 Points. In order to field a full squad of 6 players, the software mathematically enforces specific reserve deductions so teams cannot make careless mistakes.

TOTAL TEAM PURSE

5,00,000

OWNER RESERVED POINTS

- 30,000

USABLE PLAYER PURSE

4,70,000

2.2 Squad Capacity: Exactly 6 Members

A team roster consists of 1 Team Owner (locked upfront) + 5 Auctioned Players = 6 Members Total. Once a team wins 5 players in the auction, their squad is FULL. The system will automatically close their bidding portal and display "SQUAD COMPLETED".

2.3 The "Minimum Reserve per Unfilled Slot" Rule

Why can't a team spend 4,50,000 points on their first player? Because they still need 4 more players! If they spent 4.5 Lakhs, they would only have 20,000 points left for 4 players—which would break the minimum base price rules. Therefore, the software enforces the Dynamic Max Legal Bid Guard:

Max Legal Bid = Current Balance - ((Remaining Players to Buy - 1) × 30,000)

This formula guarantees that exactly 130,000 points are locked away for every remaining unfilled slot.

2.4 Practical Bidding Calculations (Real Examples)

Scenario 1 (First Player of the Auction):

Purse = 4,70,000 pts. Team needs 5 players. Reserve for other 4 players = $4 \times 30,000 = 1,20,000$ pts.

-> Max Legal First Bid = $4,70,000 - 1,20,000 = 3,50,000$ Points.

Scenario 2 (Mid-Auction - 4 Players Remaining):

Team bought Player 1 for 1,50,000 pts. Current purse = 3,20,000 pts. 4 players remaining.

Reserve for other 3 players = $3 \times 30,000 = 90,000$ pts.

-> Max Legal Bid on Next Player = $3,20,000 - 90,000 = 2,30,000$ Points.

Scenario 3 (The 5th & Final Player):

Remaining players after this one = 0. No further reserve needed.

-> The team can legally spend their entire remaining balance down to 0 Points!

Chapter 3: System Access & Admin Credentials

Security Protocols, Passwords and Screen Roles

3.1 System Screen Structure (4 Major Interfaces)

1. Public Website (/)

Open to all badminton fans, players, and sponsors. View live rosters, player profiles, standings points table, and real-time auction ticker without logging in.

2. Admin Console (/admin)

Restricted to tournament officials. Used by the Auctioneer operator to manage candidate queues, start clocks, place bids, and record match scores.

3. Arena Projector (/projector)

Designed for 1080p/4K venue TVs, projectors, or LED walls. Spotlight player photo, animated 20s countdown ring, current leading bid, and team logos.

4. Team Portals (/team-portal/:id)

Private screen for team owners at their tables. Shows their live budget balance, roster count, and instant 1-tap bid buttons (+10k, +20k, +50k).

3.2 Production Admin Login Credentials (Confidential)

To maintain auction integrity, credentials are NOT displayed on the public website. Store these securely:

ADMINISTRATIVE AUTHENTICATION DESK

Super Administrator (Full System Control & Database Settings):

Username: admin@gulfoil.com

Password: GBL2026@Admin!

Chief Auctioneer Desk (Bidding Operator Mode):

Username: auction@gulfoil.com

Password: GBL2026@Auction!

3.3 First-Time Database Synchronization (Supabase)

If your database ever shows "0 rows" or "violates row-level security", simply open the Supabase SQL Editor (>_), paste the master query from `supabase/setup\_and\_seed\_all.sql`, and click "Run". This instantly recreates all 10 teams, 69 players, and unlocks unrestricted read/write permissions for the admin portal.

Chapter 4: The Live Auction Conductor Guide

Step-by-Step Practical Script for the Stage Auctioneer & Operator

4.1 Hardware & Venue Setup (30 Minutes Before Start)

1. Connect Operator Laptop to WiFi & navigate to /admin/auction (Auction Master view).
2. Connect Projector Screen Laptop to Hall LED TV/Projector via HDMI & open /projector in Fullscreen (F11).
3. Test sound audio: Ensure the venue speaker system plays the bid chime and the final gavel gong.
4. Team Table Check: Confirm each of the 10 team tables has a phone or iPad open to their team bidding portal.

4.2 The 7-Step Live Auction Procedure (Per Player)

Step 1: Select Candidate

The operator clicks "Call Next Player" or selects a player from the queue. The player's full profile, academy, photo, and eligible categories appear on both the operator console and the venue big screen.

Step 2: Announce Candidate

The Auctioneer speaks into the mic: "Calling Player No. GBL-012: Jeeva, Age 42, Sharavanas Badminton Academy. Eligible for Open and 35+ Jumbled. Base starting price: 20,000 Points!"

Step 3: Start the Clock

The operator clicks the green "START CLOCK" button. The animated 20-second countdown begins on the arena screen, accompanied by an opening chime.

Step 4: Receiving Bids

When a team raises their paddle or taps on their phone, the operator clicks the quick bid button (+10,000, +20,000, or +50,000) under that team's name.

Step 5: The 20s Reset

EVERY SINGLE VALID BID resets the clock back to 20 seconds. This ensures opposing teams always have a fair window of 20 seconds to counter-bid.

Step 6: The Urgent 5-Second Warning

When the timer dips below 5 seconds, the countdown circle pulses urgent crimson with rhythmic beeps ("Going once... Going twice...").

Step 7: Sold Declaration

When the timer reaches 0, the gavel bangs, confetti explodes across the arena projector, and the player is automatically marked SOLD to the winning team with points deducted!

4.3 What If Nobody Bids? (Unsold Protocol)

If the 20 seconds expire with zero bids, click "Mark UNSOLD". The player is safely placed into the Unsold Pool. After all 69 players have had their first round, the Auctioneer can click "Re-Auction Unsold Players" to bring them back at a reduced base price.

Chapter 5: Where & How Teams Bid

Two Operating Models: Mobile Table Portals vs Physical Paddles

5.1 Method A: Digital Mobile Bidding Portals (/team-portal/:id)

Every team has a private, mobile-optimized bidding console designed to be used on smartphones or tablets at the team table. Team owners simply open their dedicated URL (e.g. `https://your-site.vercel.app/team-portal/team-1``).

WHAT TEAM OWNERS SEE ON THEIR PHONES:

- Live Remaining Purse Budget: Updates in real-time as points are spent.
- Active Player Spotlight: Instant photo, name, academy, and current high bidder.
- Dynamic One-Tap Bid Buttons: Big touch pads for +10,000, +20,000, and +50,000 points.
- Automatic Bankruptcy Lock: If a bid exceeds the team's Max Legal Bid, the button disables with a red warning: "Exceeds squad reserve".
- Realtime Audio Feedback: Plays a reassuring chime whenever their bid is accepted.

5.2 Method B: Physical Paddle Bidding (Traditional Auction Style)

If your venue has spotty WiFi or if team owners prefer holding numbered paddles, the Auction Operator at the main stage laptop controls the bidding directly from ``admin/auction``.

1. Team Raises Paddle

The owner of Gulf Thunderbolts (Table 2) raises their paddle in the hall.

2. Auctioneer Acknowledges

The Auctioneer shouts: "Bid taken by Gulf Thunderbolts at 70,000 Points!"

3. Operator Clicks Button

The operator clicks the "+10k" or "GT" button on the screen. The big screen instantly flashes Thunderbolts as the leading bidder and the clock resets to 20s.

5.3 Correcting Human Errors During Live Bidding

Undo Last Bid:

If the operator mistakenly clicked the wrong team, click "Undo Last Bid" immediately. The system restores the previous bidder and previous price seamlessly.

Edit Bid Amount:

If an unusual increment is requested (e.g. jumping from $\text{\$}1,00,000$ straight to $\text{\$}1,75,000$), enter the custom amount into the manual bid box and click Submit.

Cancel Sold Status:

If a player was marked sold prematurely, go to Auction History, locate the player, and click "Reopen Bidding". The points are refunded to the team and the player returns to active status.

Chapter 6 & 7: Tournament Operations & Emergency Kit

Post-Auction Match Management, Data Backups & Safety Nets

6.1 Recording Match Results & Live Points Table (/admin/results)

After the auction concludes, the tournament fixtures begin. The match scoring module allows officials to record court fixtures and set scores (Set 1, Set 2, Set 3). Matches follow standard 21-point BWF badminton scoring. As soon as a match winner is saved, the live Points Table automatically calculates:

- Matches Played, Won, and Lost
- Standing Points (2 points per win)
- Total Score For, Score Against, and Score Differential (used for tie-breakers)

7.1 Tournament Data Backup & Restore (/admin/settings)

Never worry about data loss. The system includes an automated 1-click JSON snapshot utility:

- Click "Export Tournament Backup" at any point to download the complete tournament state (all wallets, sold players, and matches) into a single timestamped `.json` file.
- If a laptop crashes or battery dies, plug in any other laptop, log in, and click "Import & Restore Backup" to restore the exact state in 2 seconds.

7.2 Granular Reset Controls (Super Admin Only)

For rehearsal or tournament resets, navigate to /admin/settings. Reset actions are guarded by strict typing confirmation ("confirm") so data cannot be deleted accidentally:

1. Reset Auction Only: Clears sold prices and bids; returns all 69 players to UNSOLD and all wallets back to 15,00,000.
2. Reset Results Only: Clears match score sheets and resets the Points Table.
3. Complete Tournament Reset: Returns the entire platform to fresh tournament seed state.

7.3 Emergency Troubleshooting Quick Reference

What if venue WiFi disconnects during bidding?

The system has an offline local cache and will keep counting down without crashing. Once reconnected, it syncs bids to the cloud.

What if the big screen freezes?

Simply press F5 on the projector laptop. The projector reconnects to the live state in under 1 second without disturbing the auction.

What if an owner accidentally bids on the wrong player?

Click "Undo Last Bid" on the operator console or "Cancel Sold" from the Auction History tab. Points are instantly refunded.
